

PERCENTAGES

DESCRIPTION:

Understanding and calculating percentages is an essential skill in business – market share, growth rates, interest rates, and many ratios are expressed as a percentage. This tutorial will introduce the basics of percentages, but many of the other MBTN modules will provide additional practice and contexts.

Tutorial: 18 slides
Problem Sets: 4 problem sets; 22 questions
Average Time: 59 minutes

Sample question from problem set:

Course: Faculty Access (All Modules in Alphabetical Order)

Module: Percentages / Problem Set ID: 1001

Scarborough Faire Herb Farm is a small company specializing in selling organic fresh herbs, teas, and herbal crafts. Currently, basil is their top selling herb, with **\$40,000** in sales last year. Parsley is their second biggest seller with **\$27,000** in sales. Total sales last year were **\$150,000** and Scarborough Faire forecasts sales to increase by **7%** this year.

What percent of total sales does basil represent?

  percent (%)

PS1 1 2 3 4
